EXPERIENCE

Procon Energie Limited | Port Harcourt, Nigeria

May 2023 - Current
Engineering Intern

- Programmed a console application that helped company staff search through large file catalogs and folders in milliseconds; thereby eliminating time spent finding documents and increasing productivity.
- Generated design and project documents using AutoCAD and other software.
- Aided other engineers and senior design engineers with project planning and design development.
- Assisted with engineering change order documentation and revised drawings.

Cyclebreeze Research and Development | Remote, Nigeria

August 2022 - December 2022
Full Stack JavaScript Developer

- Integrated user financial records analysis by consuming APIs from different platforms and implementing a custom algorithm that tracks user income and expenses.
- Built server architecture and database design for various projects.
- Translated UI designs to pixel-perfect web clients
- Worked with development teams to build software products for clients.
- Developed dashboards for various products including an e-commerce platform, fintech application, etc.
- Carried out code reviews and debugged existing code built by previous developers.
- Achieved development milestones and scheduled targets.

Dantown Assets Limited | Port Harcourt, Nigeria

June 2022 - December 2022
Front-End Developer

- Worked with a team of developers to build dashboard systems for the company's main product - Dantown mobile app, both for users, managers, and the CEO
- Developed user interfaces for the official website and blog pages based on the design from the product team
- Contributed to the development of a wallet-as-a-service product to provide wallets for startups and businesses who cannot afford the services of a blockchain developer.
- Introduced the use of discord bots to track the response times and improve the overall responsiveness and performance of the team.
- Engineered the discord bot by consuming the APIs provided by the platform

Vendorcrest Digital Solutions, Imo | Owerri, Nigeria

April 2021 - May 2022
Web Developer

- Developed the official website of the company
- Managed back end server logic protocols and database connections.
- Managed the mailing system for quick responses and transactional emails
- Created highly responsive and scalable web applications for use in different industries and client environments.
- Tracked changes and merged codes from different features to manage updated versions.
- Researched latest website applications to keep up with trends and latest technologies.

VOLUNTEER

Google Solutions Challenge | Owerri, Nigeria

February 2023 - April 2023
Backend Developer

- Contributed to the development of a backend application for the Google Solution Challenge 2023, developed by GDSC FUTO.
- Implemented features such as allowing the upload of multiple images, filtering images with Google Vision API AI, and creating an alert endpoint that brings together upload, filter, cloud upload, and push alerts.
- Improved the application's functionality by adding the ability to delete history when an alert is deleted.
