OBJECTIVE

Software Engineer with a passion for efficiency and scalability. Proponent of clean code and best practices. Skillful with programming languages like Javascript, PHP, Typescript and Python, and various web technologies. I love to explore alternative tools and software solutions. I also love to read widely and learn new things.

EXPERIENCE

August, 2022 - December, 2022   **Cyclebreeze Research and Development**
Fullstack JavaScript Developer
Built server architecture and database design for projects.
Translated UI designs to pixel perfect web clients.
Developed dashboards for various products.
Worked with teams to implement features for client projects.
Debugged and optimized legacy codes.
Implemented both instant payment and recurring payments systems.

June, 2022 - November, 2022   **Dantown Assets Limited**
Frontend Developer
Worked with a team to build dashboard systems for the company's main products, both for users, managers and CEO.
Developed user interface for the official website and blog pages.
Contributed to the development of a wallet-as-a-service product.
Created a discord bot for tracking response times to improve efficiency in operations.
Designed the dashboard for viewing data summary from the bot.

April, 2021 - May, 2022   **VendorCrest Digital Solutions**
Fullstack Developer
Developed the official website for the company.
Managed the making system for quick responses and transactional emails.
Maintained the servers as well as services needed to smooth running of the website.

August, 2020 - March, 2020   **Freelancer**
Web developer
Designed and developed websites for clients.
Managed hosting and mail servers for web applications.
Maintained the websites and made necessary changes.
Implemented payment systems for clients.

SKILLS

- Web development and maintenance
- Backend development
- 3rd party API integration
- Payment module integration
- Software design and architecture
- API design and development
- Python programming
- AWS cloud tools

TECHNICAL SKILLS

- **OS**
  Windows, Linux

- **Web Technologies and Frameworks**
  React, Next js, Vue js, Express js, Node js, PHP, Firebase, React-native, Flask

- **Programming languages**
  JavaScript, Typescript, PHP, Python

- **UI**
  CSS3, Tailwind, Bootstrap 5, React-bootstrap, Material UI, React native paper

- **Database and ORM**
  MySQL, Postgres, MongoDB, Prisma, Sequelize

- **Web Debug Tools**
  Mozilla Firebug debugger, Chrome developer tools, Expo debugger

- **Cloud providers**
  Amazon Web Services, Firebase, Supabase, Heroku, Vercel

- **Versioning and other tools**
  Git and Github, Docker, Github Actions

- **Social Media**
  Discord, Twitter, LinkedIn, Telegram
